EDUCATION

Washington University in St. Louis | Danforth Scholar (Full tuition, Merit-based) **Expected May 2028**
*Bachelor of Science in Computer Science and Business – Dean's List, **4.0 GPA***

- Coursework: Data Structures and Algorithms, Object Oriented Programming, Web Development, Linear Algebra, Parallel and Concurrent Programming, Responsible Data Science, Managerial Statistics

LEADERSHIP & HONORS

Google Developers Group **(Chapter President):** led DevFest WashU 2026 with **100+** teams & raised $5k+ in sponsorships
Google Cybersecurity Professional Certificate: 8-course Python program for cybersecurity, Linux, SQL, SIEM tools, and IDS
Capital One Technology Summit: selected 1 of 35 nationally (C/C++ Arduino IoT, Node.js sensor bridge)
WUSTL Teaching Assistant & Section Lead (Data Structures and Algorithms): Led **15+** grader team for **200+** students

EXPERIENCE

World Wide Technology | St. Louis, Missouri **May 2026 – Aug 2026**
Software Engineer Intern

- Engineered Ask Brett, a RAG-optimized AI agent, reducing troubleshooting latency 60% via custom audit APIs and 10k-character context injection across **5+** enterprise workflows
- Developed three high-throughput RESTful microservices with Hapi.js and Oracle DB, exposing MAD history/overrides metrics to streamline real-time inventory allocation decisions for **15+ global enterprise clients**
- Built a Jest unit-test suite with dependency mocking for the service's critical endpoints, raising coverage to **80%** and catching regressions before release

OpsCompanion | St. Louis, Missouri **May 2026 – Aug 2026**
Software Engineer Intern

- Architected a local-first image PII redaction pipeline in Rust/Tauri; achieved **93%** detection accuracy across 15+ synthetic benchmarks; optimized inference latency to **~400ms**
- Designed a cinematic, GPU-accelerated onboarding flow in Rust/Tauri using native macOS AppKit integrations to deliver a high-fidelity, **60fps** first-launch experience for cross platform desktop app
- Hardened production infrastructure by fixing **19+** critical CVEs and automating Playwright E2E regression testing

Health XR (DentalTechup LLC) | St. Louis, Missouri **Sept 2025 – May 2026**
AI/ML Software Engineer Intern

- Engineered the HIPAA-compliant data-capture pipeline for an AI autopilot for dentists, processing **2+ hour** multi-modal appointments across **6 clinics** and **4,500+** patient encounters into secure LLM training data
- Architected end-to-end PII de-identification (Python, spaCy, Whisper); optimized vocal-anonymization via vectorized pitch-shifting (Librosa, NumPy) to cut processing runtime **by 35%**
- Resolved computer vision stability issues using MediaPipe Pose for frame-level rotation logic; utilized OpenCV to maintain blur consistency and preserve original video dimensions

Ameribakes Baking Business | St. Louis, Missouri **Mar 2024 – May 2025**
Founder & Software Engineer

- Founded and scaled a D2C startup to **$3,500+** in revenue; built a responsive React frontend (DEMO)
- Built an automated delivery routing system using FastAPI and the Google Maps API to cluster local orders, decreasing average driver transit time by **15%**

PROJECTS

WashU Pointswap | DEMO | Next.js, TypeScript, FastAPI, Supabase, PostgreSQL **Mar 2026 – Apr 2026**

- Implemented a full-stack meal points marketplace for Washington University's **8,220** undergraduates, onboarding **230+** active students; secured access via Google OAuth scoped to @wustl.edu accounts
- Designed a responsive glassmorphism UI with Next.js 16 and Tailwind CSS on Supabase (PostgreSQL); consolidated a FastAPI service on Railway into same-origin route handlers that authorize every write server-side against a verified JWT, eliminating a deploy target and network hop, deployed on Vercel

Redline | GITHUB | Java, Spring Boot, Kafka, PostgreSQL, Redis, Docker, k6 **Jul 2026 – Jul 2026**

- Developed an event-driven service that risk-scores and auto-approves metric-definition changes, iteratively traversing a 50K-node, 400K-edge power-law DAG; version-stamped Redis cache sped up scoring **295x**
- Held zero double-applied writes across 30K duplicate deliveries using idempotency keys and compare-and-set claiming; sustained 1,013 req/s over 304K requests at zero errors; fixed a lost-update race found under load

SKILLS

Languages: Python, Java, JavaScript, C/C++, TypeScript, Rust, Swift, SQL, HTML/CSS, Mandarin (Fluent)
Frameworks/Libraries: React, React Native, Next.js, Node.js, Vue 3, Hapi.js, FastAPI, PyTorch, scikit-learn, NumPy, SwiftUI
Tools & Platforms: PostgreSQL, Oracle DB, Supabase, Firebase, Docker, Kubernetes, AWS, GCP, Git, CI/CD, REST APIs
Technical Competencies: Native iOS Development, Agile/Scrum, AI Agent Development, Prompt Engineering
